

Seal Repair Program

*All makes
and models*

*Repair or replace?
You be the judge.*

All Makes and Models

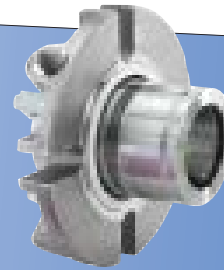

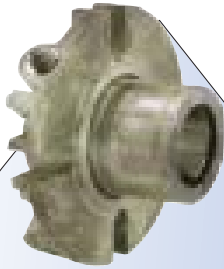

Flex-A-Seal's repair facility is one-of-a kind. We have made a commitment to repair all mechanical seal styles regardless of manufacturer. We repair to like-new condition. If the seal is not repairable, we will quote a new Flex-A-Seal as a replacement

or offer a range of exchange programs to suit the customer's needs. We have designed the Flex-A-Seal repair facility to combine state-of-the-art engineering and manufacturing capabilities. We view this commitment as a necessity to properly service our distributors and end users in today's market. Each seal component is decontaminated and evaluated in detail: faces, secondary seals and bellows

testing, metallurgical examination, drive mechanism testing, digital load testing, and critical dimensions evaluation.

Let a Seal Manufacturer handle the repair.

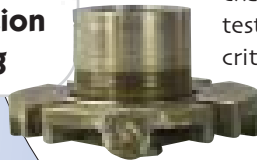

Free UPS ground return shipping in the U.S. makes Flex-A-Seal your "local" alternative*.

Free Return Shipping

Packed securely for shipping and handling. Boxes are sized for minimum space conditions.

Seals' faces are lapped to within one or two light bands (.0000235). We offer a state-of-the-art manufacturing facility, specialists dedicated to seal repair and the ability to replicate a wide variety of manufactured seal components. All seals are tested prior to shipping, which ensures the integrity of all sealing components.

A significant amount of information is generated from the detailed analysis in Step 1. With our full time staff of engineers, this information is used to analyze the overall performance of the seal and to assure we repair or replace the seal with the best and most reliable sealing option.
